Hi, Joyce and Marty,

Is this something that you could help with? Thanks.

Hi Linda,

We received this request from Erin, with the Sisseton Wahpeton Oyate Tribe. Is this something you can help them with?

Carrie

Subject: [EXT] SWO-OEP Hazardous Waste

Good afternoon Carrie! My name is Erin Kiyukanpi and I am the Environmental Director at the Office of Environmental Protection (OEP) at the Sisseton Wahpeton Oyate Tribe in Sisseton SD. I have only been in this position for about 3 months and have only worked at OEP for a total of a year and a half. I used to volunteer at their offices back in 2015 and they were trying to get rid of chemicals that were outdated and potentially harmful to the building and people in it. The problem still exists and

we are in need of disposal of said chemicals. I have attached about 80% finished inventory of the chemicals we have. The other 20% or so are either missing labels or faded labels. So we don't know what's in them. What is our option for disposal? I was made aware of the SDS labels but we would just like them to be gathered all together and sent off somewhere else to be disposed of. Is this possible? Most of the chemicals were used for water analysis and BAC-T sampling. Water sampling.
