Incident Description:

Clackamas Co Fire Hazmat Team 307 called to advise that they had responded to a vacant fiberglass manufacturing facility structure fire. Fire is controlled, and no foam was used, however there is concern about the ineffectiveness of controlling run-off consisting of fiber glass dust and unknown materials. The run-off has

soaked into gravel lot, as well as a bioswale ditch which goes into an overflow area which leads to a parking lot storm drain. The total amount of hazardous runoff is unknown.
